## The deadly truth about a world built for men - from stab vests to car crashes

Crash-test dummies based on the 'average' male are just one example of design that forgets about women - and puts lives at risk

Caroline Criado-Perez

Common Voice is Mozilla's initiative to help teach machines

Voice is natural, voice is human. That's why we're excited about creating usable voice technology for our machines. But to create voice systems, developers need an extremely large amount of voice data.

Chinamanda Ngozi Adichie | TEDGlobal 2009

MORE STORIES

# What Does My Site Cost?

Find out how much it costs for someone to use your site on mobile networks around the world.

<http://www.cnn.com> weighs 4.41MB. Here's what that costs around the globe.

Want to make things better? Check out the [full results and recommendations at WebPageTest.org](#).

Cost in USD   Cost in USD, PPP   Cost as % of GNI, PPP   ☒ Postpaid   ☐ Prepaid

## Cost as a percentage of GNI (PPP method) (POSTPAID DATA)

This is the relative cost of the site based on data from the [ITU](#) and [World Bank](#). The cost of data is standardized based on the [PPP](#) factor. The cost then has affordability factored in by comparing to the [GNI](#) per capita (broken down to a daily number). Prices were collected from the operator with the largest marketshare in the country, using the least expensive plan with a (minimum) data allowance of 500 MB over (a minimum of) 30 days. Prices include taxes. Because these numbers are based on the least expensive plan, they are **best case scenarios**.

Country	% of GNI per capita (daily)
Mauritania	2.9%
Madagascar	2.38%
Vanuatu	2.26%

society might have unconsciously shaped my beliefs,  
but I am strong enough to change them on my own.
