

WHY CSS GRID IS A GAME-CHANGER FOR WEB DESIGN

CONSTELLATION

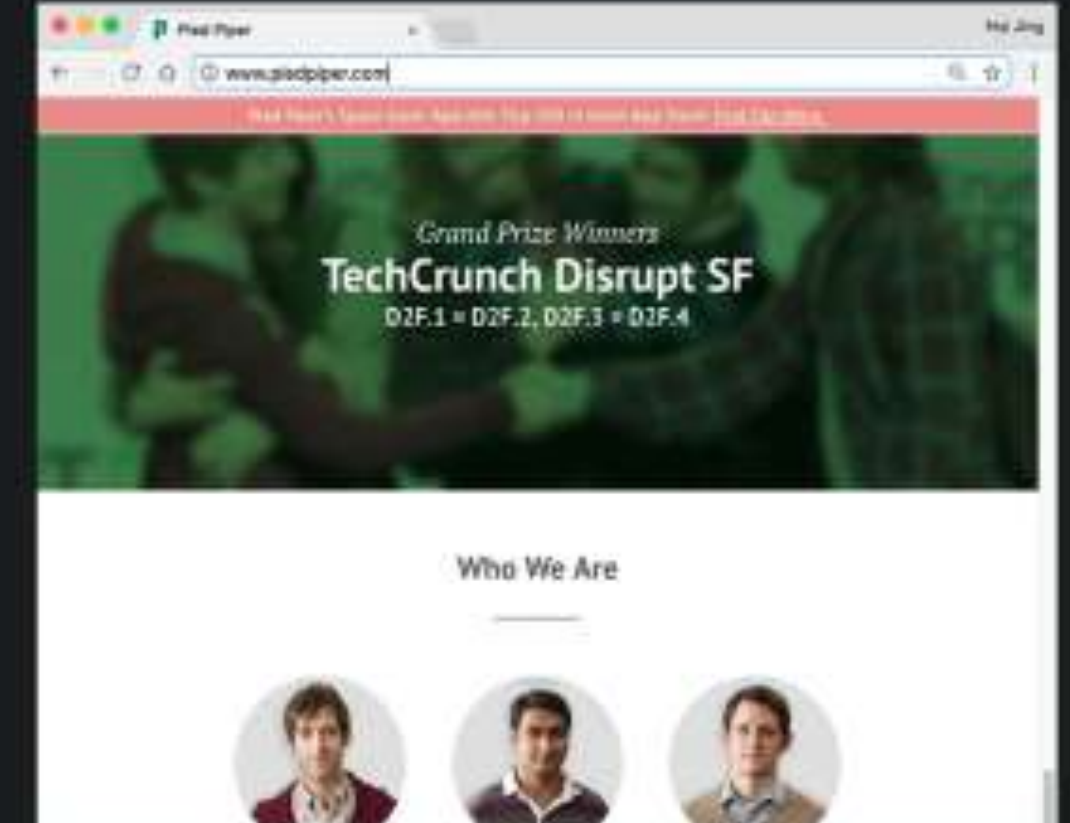

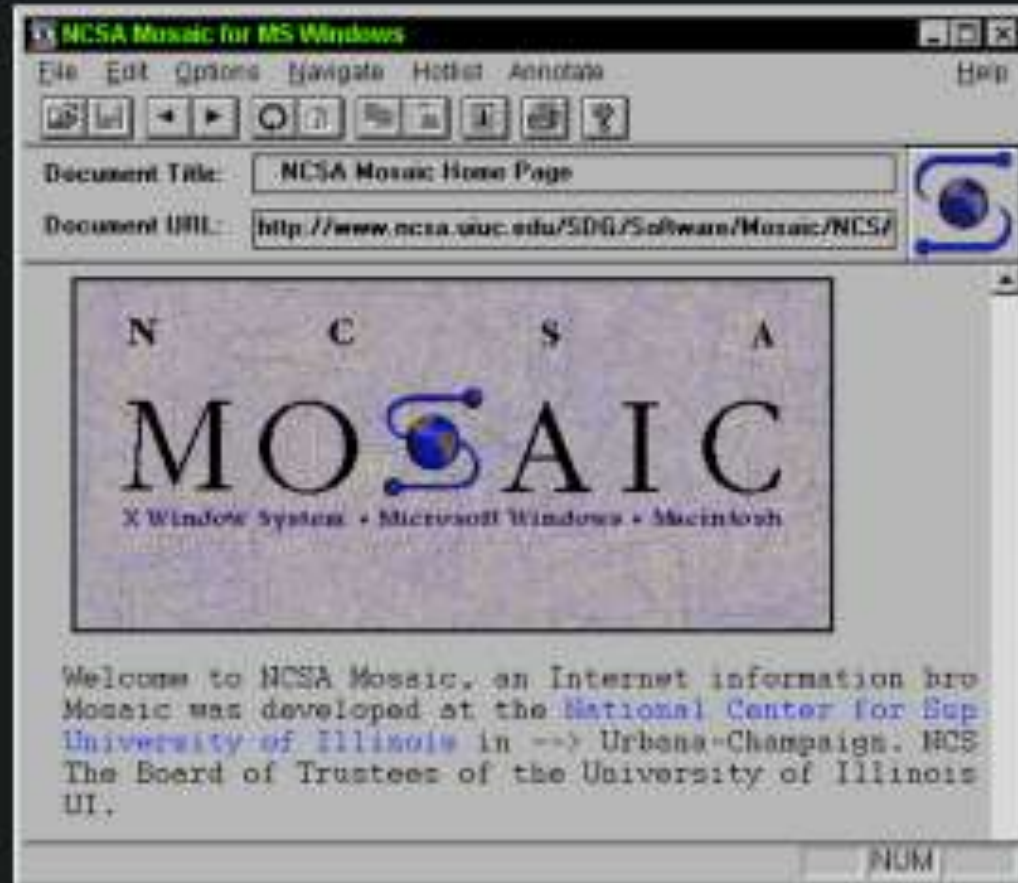

The World Wide Web
Launch back in 1990

Web layouts over the years

Grid or Flexbox?

WRONG QUESTION

Grid AND Flexbox

Flexbox → single dimension

flex-direction: row

flex-direction: column

What is CSS grid?

Defines a **two-dimensional** grid-based layout system, optimized for user interface design.

Basic terminology

Flexbox and Grid

Based on the container-child relationship

Flex/Grid container

“Grid works from the **container** in, other layout methods start with the **item**”

—Rachel Andrew

Layout technique: **inline-block**

Item A	Item B	Item C
Item D	Item E	Item F

```
.inlineblock_item {  
  display: inline-block;  
  width: calc(100% / 3);  
}
```

Layout technique: float

Item A	Item B	Item C
Item D	Item E	Item F

```
.float__item {  
  float: left;  
  width: calc(100% / 3);  
}
```

Layout technique: flex

Item A	Item B	Item C
Item D	Item E	Item F

```
.flexbox {  
  display: flex;  
  flex-wrap: wrap;  
}  
  
.flexbox__item {  
  flex: 1 1 calc(100% / 3);  
}
```

“Grid is the only layout technique that establishes a **relationship** between rows and columns of grid items.”

CSS grid basics

Define your grid.

Place items in the grid.

Properties on the Grid container

Defining a grid

```
<div class="grid1">
  <div class="grid1__item">
    <p>Item A</p>
  </div>
  <div class="grid1__item">
    <p>Item B</p>
  </div>
  <div class="grid1__item">
    <p>Item C</p>
  </div>
  <div class="grid1__item">
    <p>Item D</p>
  </div>
  <div class="grid1__item">
    <p>Item E</p>
  </div>
  <div class="grid1__item">
    <p>Item F</p>
  </div>
</div>
```

```
.grid1 {
  display: grid;
  grid-template-columns: 150px 150px 150px;
  grid-template-rows: 100px 100px;
  grid-gap: 20px;
}
```

“Cede **control** of your designs to the **browsers** that render them.”

The **fr** unit

Represents a **fraction** of the **free space** in the grid container.

Item A	Item B	Item C

```
.grid4 {  
  display: grid;  
  grid-template-columns: 150px 1fr  
  2fr;  
}
```

Fluid CSS grid

```
.container {  
  display: grid;  
  grid-template-columns: repeat(3, 3fr 2fr);  
}
```

The `minmax()` function

Defines a size range for columns or rows in the grid.

Item A

Item B

Item C

```
.grid5 {  
  display: grid;  
  grid-template-columns:  
  minmax(200px, 1fr) 300px 300px;  
}
```

The repeat () function

To specify a large number of columns or rows that follow a similar pattern

Item	Item	Item	Item	Item	Item	Item	Item
------	------	------	------	------	------	------	------

```
.grid6 {  
  display: grid;  
  grid-template-columns: repeat(4,  
75px 120px);  
}
```

auto-fill vs. auto-fit

Allow browser to determine how many tracks to create depending on track size.

```
repeat(auto-fill, 100px);
```

```
repeat(auto-fit, 100px);
```

auto-fit collapses empty tracks.

auto-fill versus auto-fit

A	B	C	D	E	F	

```
.keyword {  
  display: grid;  
  grid-template-columns:  
  repeat(auto-fill, minmax(2.5em,  
  1fr));  
}
```

auto-fill versus auto-fit

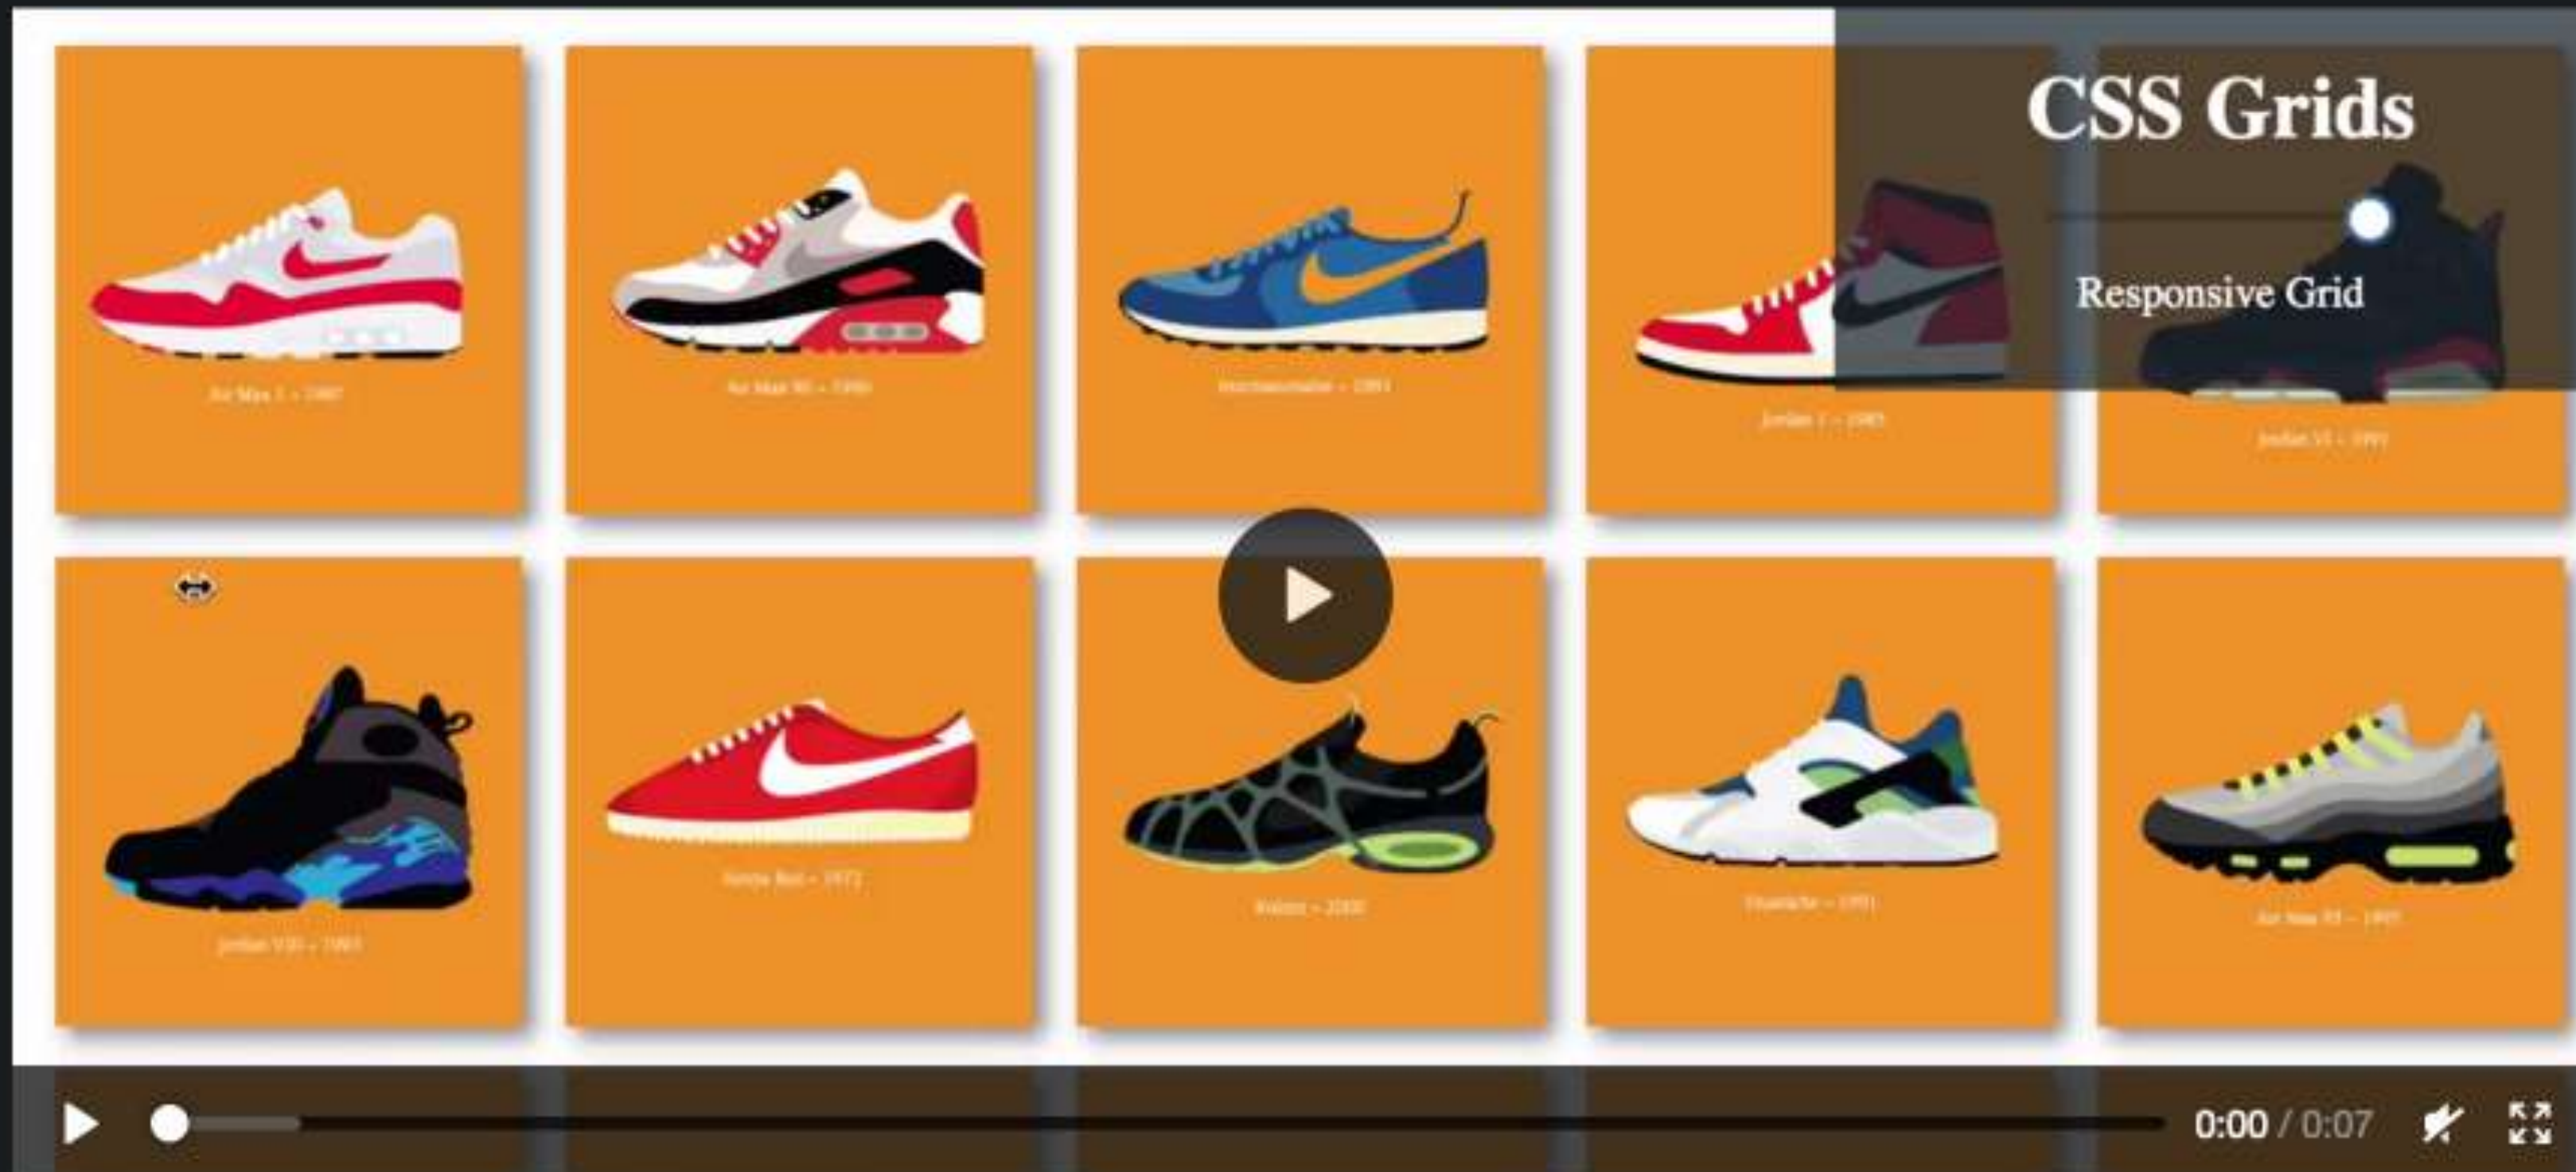

A	B	C	D	E	F

```
.keyword {  
  display: grid;  
  grid-template-columns:  
repeat(auto-fit, minmax(2.5em,  
1fr));  
}
```

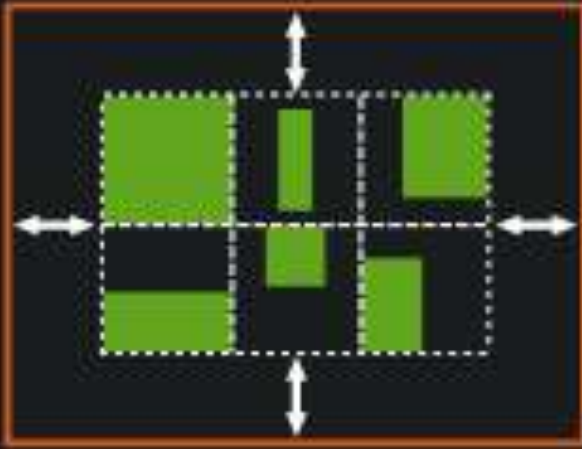

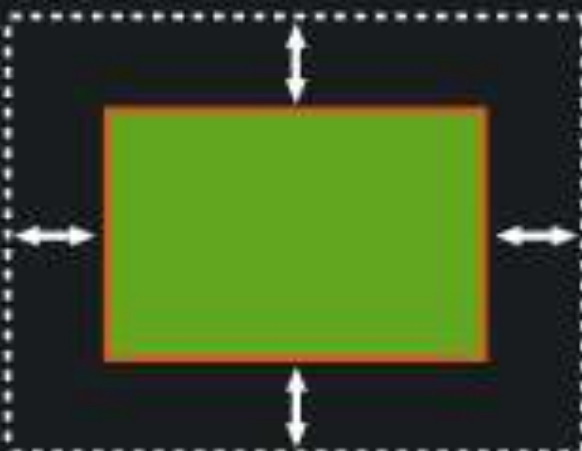

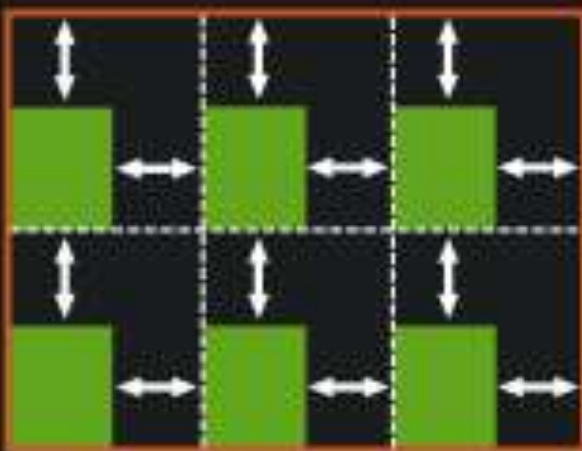

Responsive grid without media queries

```
.container {  
  display: grid;  
  grid-template-columns: repeat(auto-fill, minmax(10em, 1fr));  
}
```

Aligning your grid items

Property	Axis	Aligns		Applies to
<code>justify-content</code>	main/inline	content within element (effectively adjusts padding)		block containers, flex containers and grid containers
<code>align-content</code>	cross/block			
<code>justify-self</code>	inline	element within parent (effectively adjusts margins)		block-level boxes, absolutely-positioned boxes and grid items
<code>align-self</code>	cross/block			absolutely-positioned boxes, flex items and grid items
<code>justify-items</code>	inline	items inside box (controls child items)		block containers and grid containers
<code>align-items</code>	cross/block			flex-containers and grid-containers

justify/align-content

content-distribution properties

```
.content {  
  justify-content: normal;  
  align-content: normal;  
  
  display: grid;  
  grid-template-columns: repeat(3,  
25%);  
  grid-template-rows: repeat(3, 20%);  
  grid-gap: 1em;  
  grid-template-areas:  
    "a b b"  
    "a b b"  
    "c c d";  
}  
  
.content_itemA {  
  grid-area: a;  
}
```

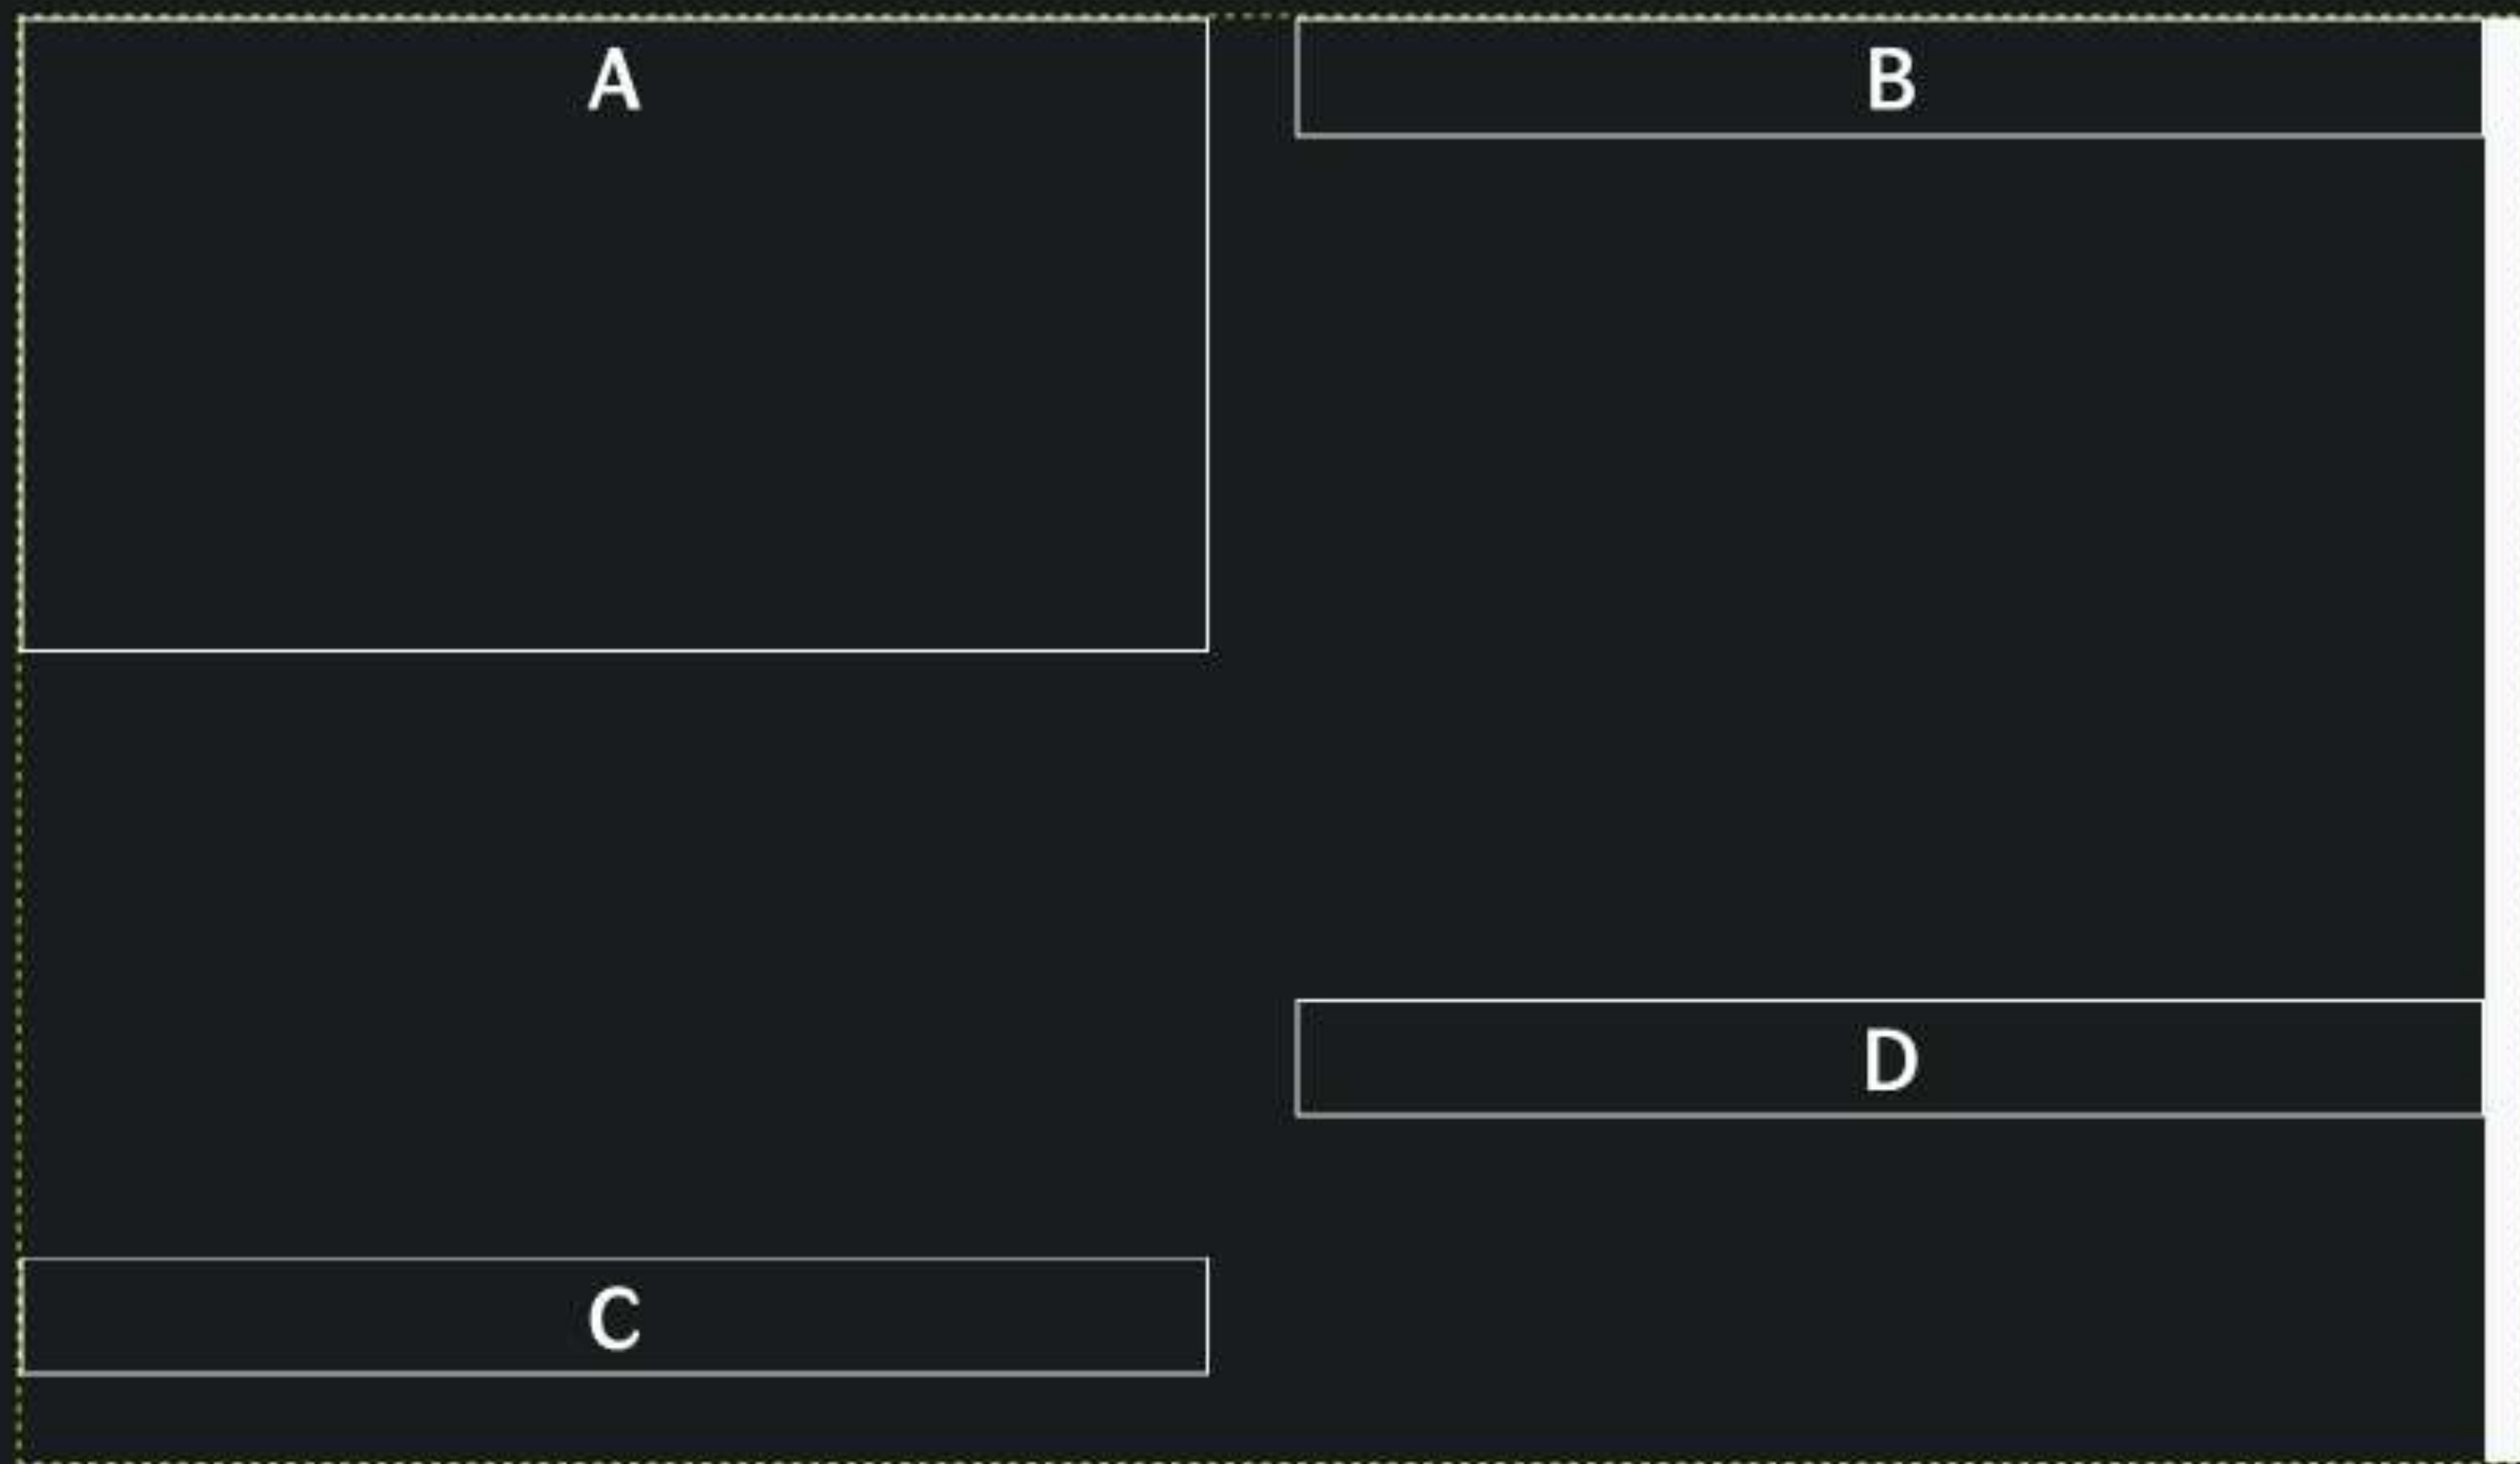

Values	justify-content	align-content
center		
start		
end		
space-around		
space-between		
space-evenly		

justify/align-self

self-alignment properties

```
.self {  
  display: grid;  
  grid-template-columns: repeat(4,  
1fr);  
  grid-gap: 1em;  
  grid-auto-rows: calc(25% - 1em);  
  grid-template-areas:  
    "a a b b"  
    "a a b b"  
    "c c d d"  
    "c c d d";  
}  
  
.self_itemA {  
  grid-area: a;  
}  
  
.self_itemB {  
  grid-area: b;  
}
```

justify/align-items

defaults for justify/align-self

A

B

C

D

```
.items {  
  justify-items: normal;  
  align-items: normal;  
  
  display: grid;  
  grid-template-columns: repeat(4,  
1fr);  
  grid-gap: 1em;  
  grid-auto-rows: calc(25% - 1em);  
  grid-template-areas:  
    "a a b b"  
    "a a b b"  
    "c c d d"  
    "c c d d";  
}  
  
.items_itemA {  
  grid-area: a;  
}
```

Tiefe Fliegeraufnahme
über einem Platz mit

8

Straßenöffnungen.

TEMPO-o-

Die Fahrzeuge: elektrische Straßenbahn, Autos, Lastwagen, Fahrräder, Droschken, Autobus, Cyklonette, Motorräder fahren in raschem Tempo vom Mittelpunkt auswärts, dann plötzlich alle umgekehrt; in der Mitte treffen sie sich. Die Mitte öffnet sich, ALLES sinkt tief, tief, tief — ein Funkturm.

(Der Apparat wird rasch umgekippt; das Gefühl eines Tiefstürzens entsteht.)

Unter den Straßenzügen die ausgebauten Kloaken. Lichtglanz auf dem Wasserspiegel.

These are not the borders you are looking for

Flexbox to the rescue

That's more like it

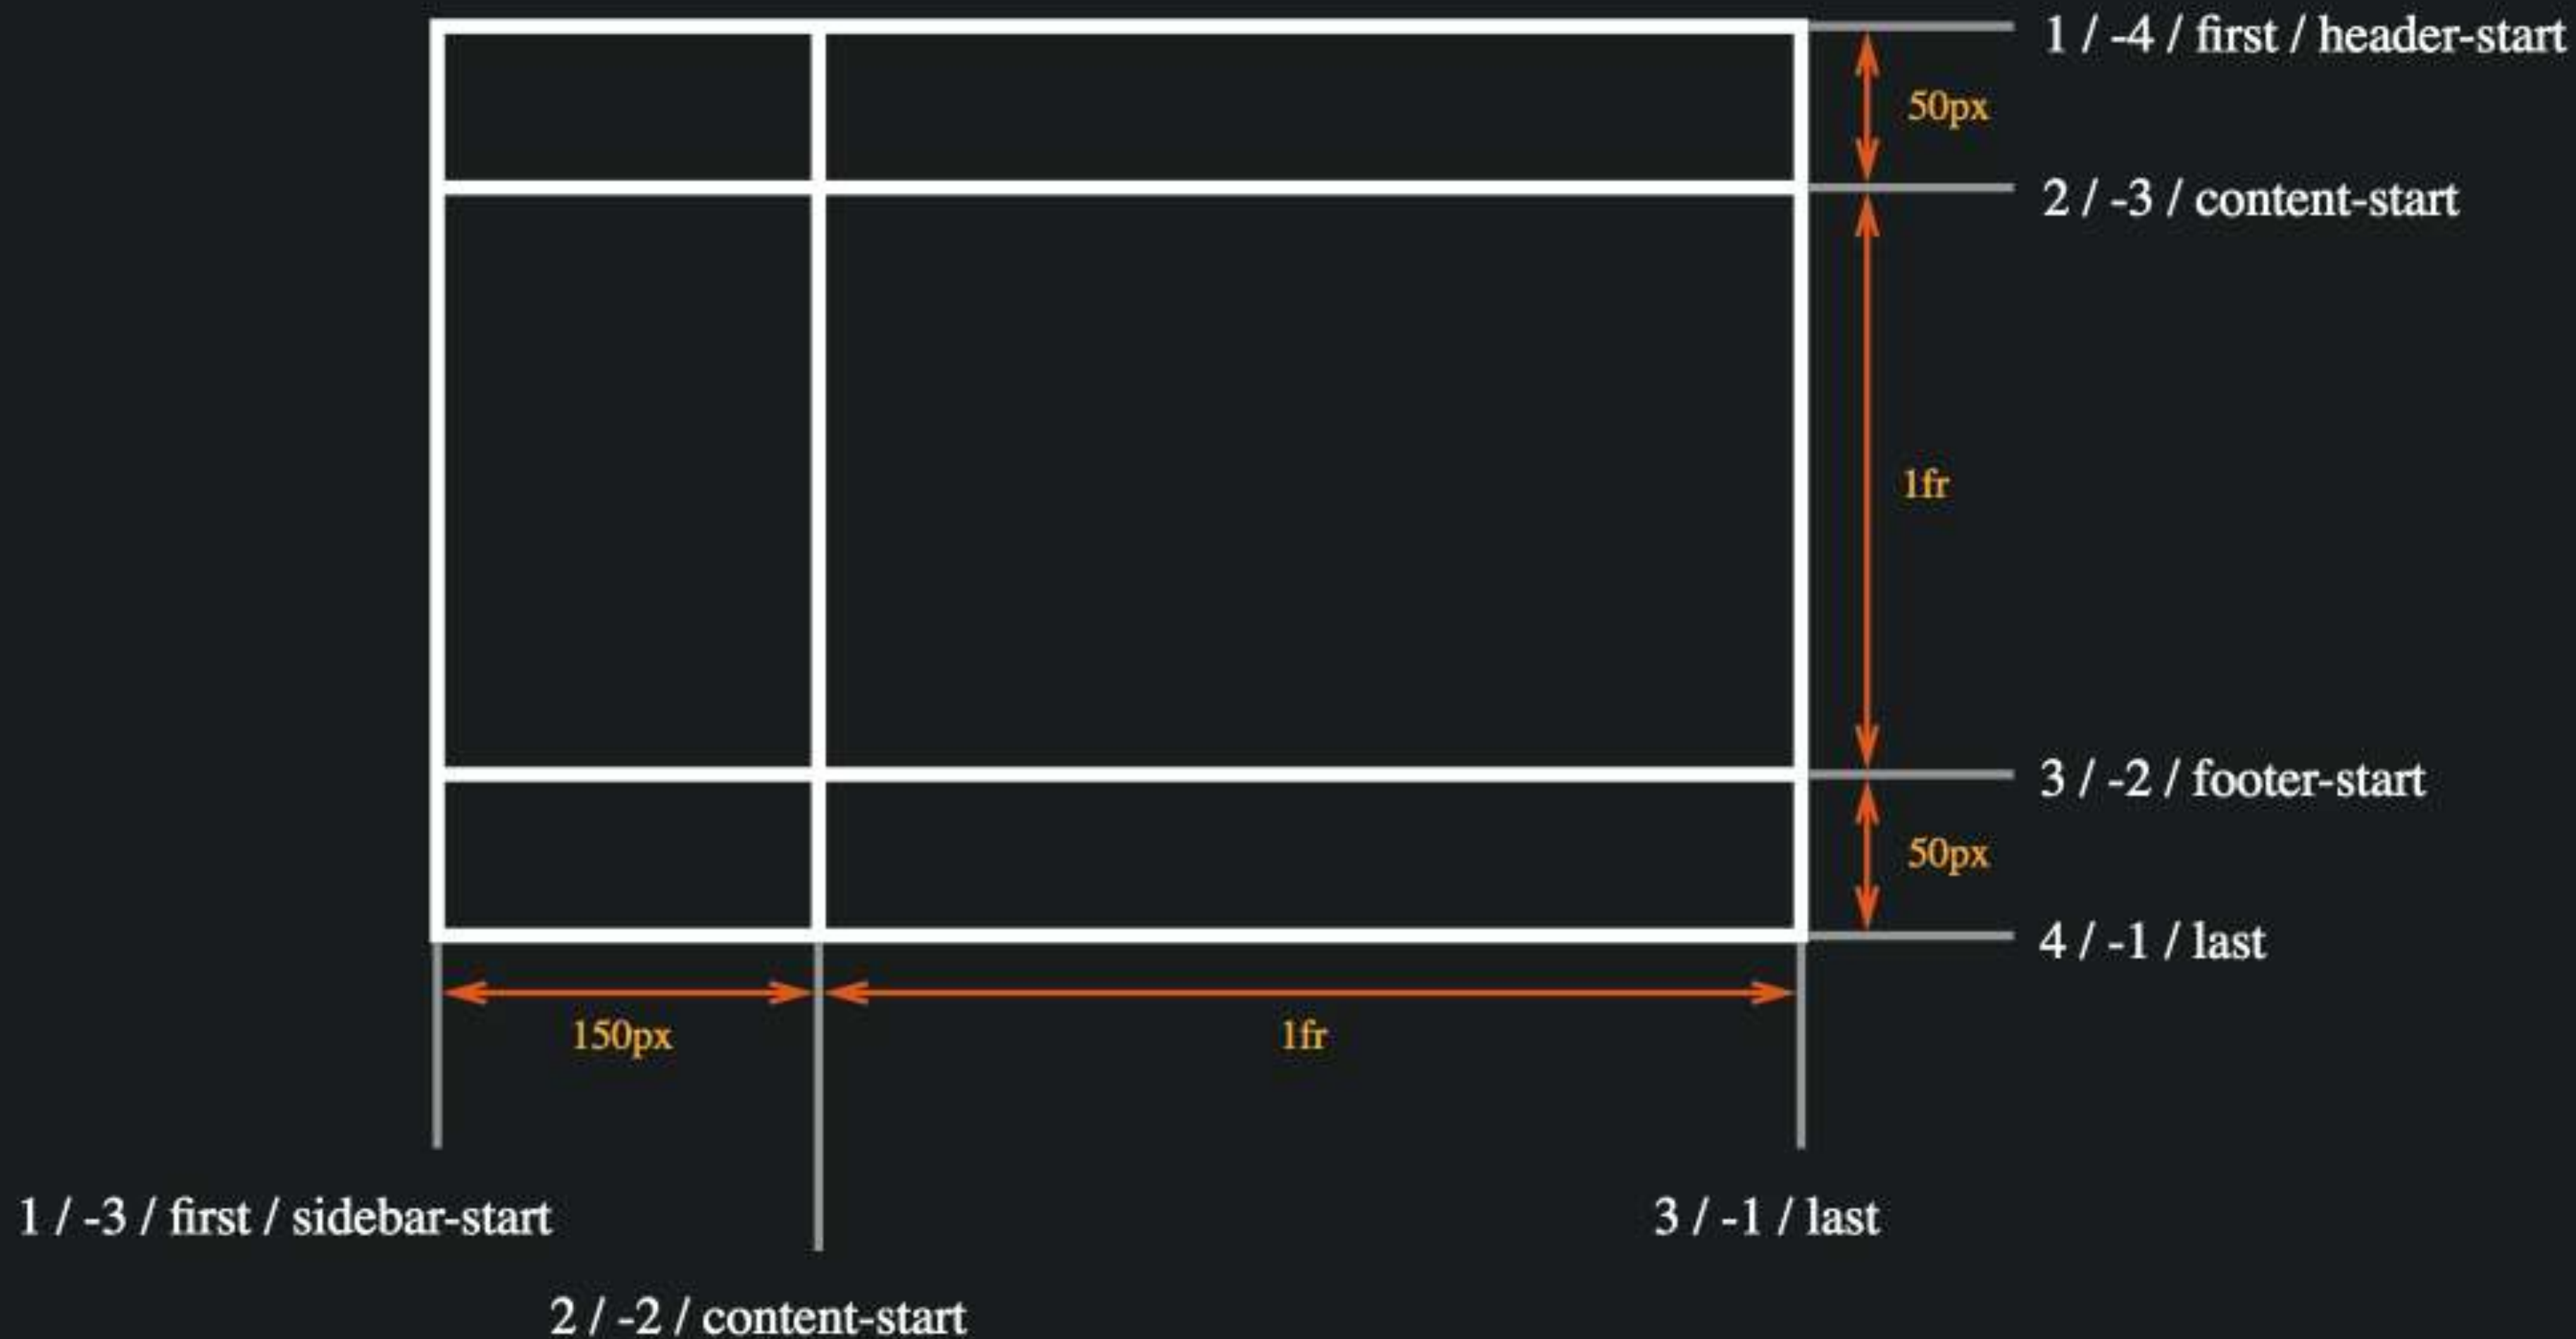

Properties on the grid item

Grid placement with grid lines / named lines

```
grid-template-columns: [first sidebar-start] 250px [sidebar-end content-start] 1fr [content-end last  
grid-template-rows: [first header-start] 100px [header-end content-start] 1fr [content-end footer-st
```

Using grid-column and grid-row

```
.grid7 {  
  display: grid;  
  grid-template-columns: repeat(6,  
    2.6em);  
  grid-template-rows: repeat(6,  
    2.6em);  
  justify-content: center;  
}  
  
.grid7__item:nth-child(1) {  
  grid-column: 4;  
  grid-row: 2;  
}  
  
.grid7__item:nth-child(3) {  
  grid-column: 2;  
  grid-row: 5;  
}
```

Grid placement with named areas

```
.grid-container {  
  display: grid;  
  grid-template-areas: "logo stats"  
                      "score stats"  
                      "board board"  
                      "... controls";  
}
```

```
.logo { grid-area: logo; }  
.score { grid-area: score; }  
.stats { grid-area: stats; }  
.board { grid-area: board; }  
.controls { grid-area: controls; }
```

Using grid areas

```
.grid3 {  
  display: grid;  
  grid-template-columns: 150px  
150px 150px 150px;  
  grid-template-rows: 100px 100px  
100px;  
  grid-template-areas: 'a . . .'  
                      'a . . c'  
                      '. b . c';  
}  
  
.grid3 .a { grid-area: a; }  
.grid3 .b { grid-area: b; }  
.grid3 .c { grid-area: c; }
```

Braun HiFi Steuergerät audio 300

title

In der modernen Aufnahmetechnik
ist keine Mühe zu groß, kein
Aufwand zu kostspielig, um auch
allerletzte Feinheiten einer
Interpretation zu erhalten.

Demgegenüber gibt es aber nur
wenige HiFi Ger^{text}äte, die es
fertigbringen, den ganzen
Nuancenreichtum wieder vollends
hörbar zu machen.

Ein Gerät mit diesen Fähigkeiten ist
das neue "audio 300", eine
Kompaktanlage mit ungewöhnlicher
technischer Ausrüstung und einem
formalen Konzept, das Braun
höchste internationale
Auszeichnungen eintrug.

GENERATION

Overlap

H55
<http://www.h55studio.com>

Tuesday 10th May
Hanson Ho

With his bold, stripped-back typographic approach, Hanson Ho founded H55 in 1999. It is now one of the most recognised and celebrated graphic design studios in Singapore.

much influenced by Europe. Less culture and tradition. So I'm quite surprised you say that Hong Kong has a wider creative industry – they have a music industry, places like Taiwan have big stars, movie stars, film makers. Here there is nothing like that, the population is too small.

How, you can say things in the time you've been designing here?

Things have changed here a lot in the last ten years. The last generation was kind of traditional, quite hierarchical – studios, consultants, strategists, that kind of thinking from the nineties. Not very progressive. My peers didn't want to be like our predecessors so we say "why can't we be like the studios in London?" We actually referenced London a lot, that's the truth. We admired people like Tomaso and the Designers Republic, we read Creative Review and wanted to get into O&A. Things like that. It was kind of a renaissance, if you were there at the right time to witness all of this. And so we started up our own small studios with a more independent voice – the studios had their own individualistic representation, rather than consultants, strategists blah blah blah. So I think things have changed a lot. It's easier now to set up a new business with new technology, we don't need a studio manager.

So, as well as your own studio, you also create The Design Society here in Singapore. How did things start out?

The Design Society is fairly new. It was set up a few years ago when the designers from my generation were stable and not struggling as much as when we started. We felt we should try to do something together.

What are the objectives of The Design Society?

"We are interested in archiving Singapore design history, to map it, and also to offer a more yearly conference. We have maybe four or five casual workshops a year."

HANSON HO IS VERY BUSY, AS WELL AS RUNNING H55. HE IS AN ACTIVE MEMBER OF THE DESIGN SOCIETY AND HANDLES DESIGN AND PRODUCTION OF THEIR BIENNIAL JOURNAL. HOWEVER, WE MANAGE TO ARRANGE AN EARLY MEETING OVER BREAKFAST AT SHIBLY PRATA SHOP NEAR THE STUDIO. WE OPEN BY SAYING THAT SINGAPORE IS FREQUENTLY MENTIONED AS THE GRAPHICS HUB OF SOUTHEAST ASIA...

HANSON I think Hong Kong is very vibrant compared to Singapore. They've had a very strong identity throughout the years, even in the eighties. I think it has to do with language and less diversity, whereas here, everyone is speaking a different language. Look at Japan and, yeah,

THINK GLOBAL GROW LOCAL

FIGTREE NETWORK

<http://www.figtreenetwork.com>

Wednesday 27th April

David Brabhins

Already an established consultancy in London and Paris, Figtree Network branched out to Hong Kong in 2010. David Brabhins tells us why

PROMOTING TAIWAN TOURISM FOR THE BUREAU OF ECONOMIC TRADE, TAIWAN

WE FIND THE OFFICES OF FIGTREE NETWORK TUCKED AWAY IN A QUIET BUT COOL STREET IN THE WANCHAI DISTRICT OF THE CITY. AFTER VISITING THE MONOCLE STORE ACROSS THE ROAD, WE POP IN TO CHAT WITH DAVID AND OUR CONVERSATION QUICKLY LEADS TO THE RISE OF THE CREATIVE SECTOR IN HIS NEW HOMELAND.

DAVID I think there is a push going on, though not as strongly as in Singapore, which is a shame. In Hong Kong the government have identified the creative industry as one of six areas of growth as they try to expand beyond finance, property and shipping.

We've learned that in Hong Kong technique and production standards are high, but actual design perhaps less so.

Sure, this is the big leap that Asian businesses, especially Chinese businesses need to make. We've had the experience of going through that process with HTC. Many businesses are not yet ready to make the leap, so our first strategy when we came here was to help Asian businesses build global brands. But it's not as simple as just doing communications. They have to invest quite heavily in a long term strategy, acquire new competencies they never had: innovation, marketing. It is a big jump for companies that are used to making things for other people, and not designing things for themselves. HTC was a bit further along because they designed stuff for mobile networks so they had all the competencies

How did Figtree Network get started?

We are about seven years old. Orange was the foundation client, I joined shortly after it was incorporated. You need eight good clients for an agency. HTC is our most recent large one and we have a couple more big ones in the UK right now.

OK, so how many offices does Figtree have?

Three. We've got London – which is our HQ – there are about forty people there. About three or four work in Paris, then eight of us here in Hong Kong.

Did you initially work in the London branch?

Yeah. Back in the days when we were three guys in a garage, just like Google!

What brought you to Hong Kong?

Opportunity and change of scene. I was getting a bit bored with London: the weather (not the heat), high tax, low growth... I found that I kept shopping over at Hong Kong when I was on my way to Taiwan to meet with HTC. I used to come here before flying back to London to catch up with some mates. I gradually fell in love with the place, so I thought "Well, what we do could work here," so here we are.

THE ELECTRIC FACTORY

Tycho

Earlier this year, San Francisco-bred artist and designer Tycho announced a new album on the way for 2016, but gave scant details about the project, leaving fans to speculate about just what the ambient master had in store. Fans need no longer worry, as Tycho's fifth studio album, *Epoch*, has arrived in grand fashion.

Fallback with feature queries

A conditional group rule whose condition tests whether the user agent supports CSS property: value pairs.

Anatomy of a feature query

```
.selector {  
  /* Styles that are supported in old browsers */  
}  
  
@supports (property:value) {  
  .selector {  
    /* Styles for browsers that support the specified property */  
  }  
}
```

Browser support for @supports

CSS Feature Queries [↗](#)

CSS Feature Queries allow authors to condition rules based on whether particular property declarations are supported in CSS using the @supports at rule.
